Jordan Mitchell

Software Engineer

jordan.mitchell@email.com | Cape Town, SA | linkedin.com/in/jordanmitchell

SUMMARY

Software engineer with 4 years of experience building backend services in Python and Go. Comfortable owning features end-to-end and collaborating closely with product and design teams.

EXPERIENCE

Software Engineer, Nexbank Technologies *2022 - 2026*

- Built and maintained REST APIs for a payment processing platform handling 200K+ transactions/day.
- Collaborated with senior engineers on service migrations to Kubernetes.
- Wrote automated tests that reduced regression bugs by 25%.

Junior Software Engineer, DataFlow Systems *2020 - 2022*

- Built ETL scripts processing daily batch data loads.
- Assisted in CI/CD pipeline setup, cutting manual deploy steps by half.

EDUCATION

B.Sc. Computer Science, University of Cape Town, 2020

Relevant coursework: Distributed Systems, Databases, Software Architecture

CERTIFICATIONS & TRAINING

AWS Certified Developer - Associate, 2023

Certified Kubernetes Application Developer (CKAD), 2024

Coursera: System Design Fundamentals, 2022

SKILLS

Python, Go, PostgreSQL, Docker, Kubernetes (basic), Git

HOBBIES & INTERESTS

Trail running, home coffee roasting, chess, building small Raspberry Pi projects
