核心能力 Core Strengths

Backend: Java, Kotlin, Python, Spring Boot, FastAPI

Frontend: Vue.js, TypeScript, Nuxt.js

Data: MySQL, Redis, Kafka, Elasticsearch

Delivery: Alibaba Cloud, Kubernetes, Terraform, CI/CD

Leadership: Mentoring, technical planning, code review

教育认证 Education

BS, Computer Engineering
Huazhong University of Science and Technology
2016 – 2020

Alibaba Cloud Certified Professional – Developer
Earned 2024

个人简介 Profile

I build dependable backend services and pragmatic web experiences, with a focus on API design, developer velocity, and measurable product outcomes.

工作经历 Experience

Software Engineer Mar 2023 – Present
HangSail Commerce Group, Hangzhou

- Owned order-orchestration services processing 2.6M+ monthly events; redesigned idempotency handling and reduced duplicate-order incidents by 41%.
- Delivered a Kotlin/Spring Boot fulfillment API used by four product squads, reducing integration lead time from days to hours through self-service documentation and sandbox tooling.
- Introduced OpenTelemetry tracing, service-level dashboards, and actionable alerts; cut median incident diagnosis time by 33%.
- Mentored two junior engineers and led technical design reviews for quarterly platform initiatives.

Software Engineer Jan 2021 – Feb 2023
Riverdelta Financial Technology, Shanghai

- Built customer onboarding workflows using Python, FastAPI, Vue.js, and MySQL, improving successful application completion by 20%.
- Developed asynchronous document-processing pipelines with Kafka and OSS storage, supporting peak volumes of 75,000 files per day.
- Partnered with security and compliance stakeholders to implement audit trails, data-retention controls, and role-based access policies.

重点项目 Impact Projects

开发者门户 Developer Portal Vue.js, Nuxt.js, Spring Boot, Alibaba Cloud

- Led a three-engineer initiative to centralize API discovery, access requests, and integration guides; adopted by 11 internal teams in its first quarter.

实时库存信号 Real-Time Inventory Signals Kafka, Redis, Kubernetes

- Built an event-driven inventory projection service that made stock changes available to checkout within seconds rather than through hourly batch updates.

社区参与 Community

Regular contributor to internal engineering guilds; speaker, “让 API 更易运维” (“Making APIs Easier to Operate”), Hangzhou Software Meetup, 2025.
