JORDAN VELDMAN

Cape Town, Western Cape
083 555 0192
jordan.veldman.demo@example.com

Motivated and analytical professional with a background in architecture and project management, now transitioning into Information Technology. Experienced in problem-solving, digital modeling, and managing complex projects from concept to completion. Skilled at applying technical documentation, data-driven decision-making, and digital tools to deliver innovative solutions. Currently pursuing a career shift into IT with the goal of leveraging strong analytical, research, and project coordination abilities in the tech field.

DIGITAL & TECHNICAL SOFTWARE

- SQL
- Python
- Autodesk AutoCAD
- Autodesk Revit
- Graphisoft ArchiCAD
- Lumion
- Twinmotion
- AutoCAD Architecture
- Adobe Photoshop
- Canva
- InDesign
- Google SketchUp
- Microsoft Office

EXPERIENCE

Candidate Senior Architectural Technologist Marchetti & Fell Architects (Cape Town)
04/2024 - Current

- Managed projects through multiple stages including concept, technical documentation, and client coordination.
- Applied digital tools for modelling, rendering, and project tracking.
- Produced detailed documentation, ensuring compliance with technical and regulatory requirements.
- Strengthened analytical and technical problem-solving through research and practical implementation.

Architectural Technologist Baumann & Cole Architects (Durban)
08/2023 – 02/2024

- Developed physical and computer-based models and visual aids as part of concept and design processes.
- Attention to detail and ability to balance aesthetics, functionality, and sustainability in design solutions.
- Provided suggestions on methods of remodeling & repair, to better utilize space and satisfy clients.
- Implemented analytical thinking and problem-solving abilities to address complex environmental challenges in architectural projects.
- Collaborated with architects and engineers to integrate sustainable design principles from the early stages of the project.
- Led conceptual and technical project development using software-based modelling and data analysis.
- Applied analytical problem-solving to integrate sustainable and efficient solutions.
- Collaborated with engineers and consultants to optimize digital and technical design processes.

Architectural Technologist Rivermede Architects (Durban)
05/2022 - 07/2023

- Worked on stages 1 - 4, Conceptual designs, Tender drawings, Technical Documentation, Construction Drawings, Submission Drawings, Client meetings and Correspondence, Site visits, Tender Administration & Documentation, Rep Meetings, Interior Specifications, Energy Efficiency, Interior Layouts - Joinery, Lighting & Ventilation, Power layouts.
- Managed and handled projects independently.
- Collaborated with licensing, permitting, planning and inspection authorities to evaluate and resolve concerns.
- Complied drawings, registers, specifications, and submittal packages - issued to the team & submitted to council.
- Developed models, renders and photoshop layouts as part of concept and design processes.
- Visited work sites, measured values, and evaluated progress of construction.
- Maintained excellent working relationships with regulatory bodies and authorities to achiev continued compliance with current standards.
- Filled in, complied and oversaw tender applications.
- Worked closely with consultants to assist with service coordination on the Lakeside Civic Centre Project & attended technical coordination meetings.
- Worked with landscape architects to incorporate sustainable site planning, green spaces, and stormwater management strategies.
- Understanding of service coordination - HVAC, Wet Services, Electrical & Structural.

Site Architectural Technologist Rivermede Architects
09/2022 - 05/2023

- Worked as a consultant for Solari Construction.
- Project: Lakeside Civic Centre.
- Construction drawings, Submission Drawings, Technical Documentation, Energy Efficiency, Client meetings and correspondence, Site visits, Tender Administration, Rep Meetings, Interior Specifications.
- Researched methods of construction that would reduce society's impact on the environment.
- Did research and proposals for LEED architecture.
- Visited work sites, measured values, and evaluated progress of construction.
- Put together drawings, specifications, and submittal packages.

- Coordinated with mechanical, electrical, and plumbing engineers to optimize energy-efficien systems and technologies.
- Collaborated effectively with the teams to create innovative and strategic solutions for problems that arose.
- Performed deep research into compliance, legal, environmental, and other issues in order to provide current and accurate recommendations.

Graduate Architectural Technologist Northgate Designs & Associates (Durban)
01/2022 - 04/2022

- Submission Drawings, Technical Documentation, Energy Efficiency, Client meetings and Correspondence, Submitting to council.
- Visited work sites, measured up buildings, assisted with capturing existing site.

Architectural Intern Northgate Designs & Associates (Durban)
04/2021 - 12/2021

- Submission Drawings, Technical Documentation, Energy Efficiency, Client meetings and Correspondence, Submitting to council.
- Assisted with design concept from initial inception through to completion for 10 projects.

🎓 EDUCATION

BBE: Honours in Architecture: Architecture
Lakeview University of Technology - Coastal Province, 2024
Honours of the Built Environment in Architecture, Part-Time

Bachelor of the Built Environment in Architecture: Architecture
Lakeview University of Technology - Coastal Province, 2021

Bachelor's Degree Pass
Northfield Secondary School - Durban, 2014

Honours Treatise Research Title:
Exploring Architectural Strategies for Technology Enhanced-Education towards a Multimedia Center in Cato Manor (Supervisor - Dr Alinah Ndlovu Mokwena)
