Jordan Lee

Junior Software Engineer

Seattle, Washington — (206) 555-0148 — jordan.lee@email.com
linkedin.com/in/jordanlee — github.com/jordanlee

Profile

Early-career software engineer with hands-on experience building responsive web applications and REST APIs. Comfortable collaborating in agile teams, writing tested code, and learning unfamiliar tools quickly. Seeking an entry-level role where I can contribute to reliable customer-facing software.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks: React, Node.js, Express, Flask
Tools: Git, GitHub Actions, Docker, PostgreSQL, Figma, Jira

Experience

Software Engineering Intern Jun 2025 – Feb 2026
Cascade Digital, Seattle, WA

- Built React interface components for a client portal used by approximately 1,200 monthly users.
- Implemented Express API endpoints and PostgreSQL queries for account-management workflows.
- Added unit tests with Jest and helped raise coverage for a core service from 58% to 76%.
- Participated in sprint planning, code reviews, and weekly demos with product and design teams.

Computer Science Teaching Assistant Sep 2023 – Jun 2025
University of Washington, Seattle, WA

- Guided undergraduate students through programming, data structures, and debugging fundamentals.
- Created practice exercises and concise study guides for Python and object-oriented programming.

Selected Projects

QueueWise — Appointment Scheduling App GitHub

- Developed a full-stack booking application with React, Flask, PostgreSQL, and JWT authentication.
- Designed calendar availability logic and email confirmations; deployed the application with Docker.

Campus Cart — Student Marketplace GitHub

- Created a TypeScript marketplace prototype with listing search, saved items, and role-based dashboards.
- Collaborated with three classmates using pull requests, issue tracking, and a two-week sprint cadence.

Education

BS, Computer Science 2022 – 2025
University of Washington Graduated with honors

Additional

Certifications: AWS Certified Cloud Practitioner (2025)
Activities: Women in Computing mentoring volunteer; university hackathon finalist (2024)
